

Weddings

A wedding is a special time for all involved. A lot of time, planning, work and money go into making this event and you want it to be the best ever. We love capturing the expression of all those involved especially the bride and groom as they exchange their vows and celebrate their very special day. You can relive those special moments of the bride walking down the aisle, the bride and groom's first kiss as husband and wife and see all of the guests who attended the reception. These special moments will be cherished forever.

Equipment

We use quality 3 chip High Definition cameras and wireless microphones to capture all aspects of the wedding.

What can be included in the video?

To share the story, we like taking childhood photographs or video of the bride and groom and put them into a photo montage leading up to the wedding day. Items that can be included in the video are:

The rehearsal,
Bride & groom's preparation,
Arrival of guests,
Wedding ceremony,
The reception

And any other items needed to complete this very special day.

Why choose us?

We take pride in what we do and want you to be 100% satisfied with our service. If you are not satisfied we are not satisfied.

Pricing

We offer several price packages to meet your needs.
